LONDON, UK, April 7, 2021 -- <u>CB Insight</u> today named InstaDeep to the fifth annual AI 100 ranking, showcasing the 100 most promising private AI companies in the world. It is the <u>second</u> <u>time InstaDeep features</u> on the exclusive list following the recognition in 2020, both times honoured for its cutting-edge achievements in R&D.

"This is the fifth year CB Insights has recognised the most promising private artificial intelligence companies with the AI 100, and this is one of the most global groups we've ever seen. This

International Press Release

*year's cohort spans 18 industries and is working on everything from climate risk to accelerating drug R&D,"* said CB Insights CEO Anand Sanwal in the press release announcing the top list.

"Being nominated in the global Al100 once is already very exciting. Receiving the recognition two years in a row confirms that InstaDeep is a company to watch. We are truly humbled to make it onto the list again in 2021 and are committed to bringing world-first innovation that benefits everyone, such as <u>DeepChain.bio</u>, our Al protein design platform. Exciting times ahead!" says Karim Beguir, Co-Founder & CEO of InstaDeep.

## Selected amongst 6,000 companies

Through an evidence-based approach, the CB Insights research team selected the AI 100 from a pool of over 6,000 companies based on several factors, including patent activity, investor quality, news sentiment analysis, proprietary Mosaic scores, market potential, partnerships, competitive landscape, team strength, and tech novelty. The Mosaic Score, based on CB Insights' algorithm, measures the overall health and growth potential of private companies to help predict a company's momentum.

"Last year's AI 100 companies had a remarkable run after being named to the list, with more than 50% going on to raise additional financing (totalling \$5.2B), including 16 \$100 million+ mega-rounds. Many also went on to exit via M&A, SPAC or IPO. As industry after industry adopts AI, we expect this year's class will see similar levels of interest from investors, acquirers and customers", says Sanwal.

### Quick facts on the 2021 AI 100:

- Equity funding and deals: Since 2010, the AI 100 2021 cohort has raised over \$11.7B in equity funding across 370+ deals from more than 700 investors.
- 12 unicorns: Companies with \$1B+ valuations on the list span applications as varied as data annotation, cybersecurity, sales & CRM platforms, and enterprise search.
- Geographic distribution: 64% of the selected companies are headquartered in the US. Eight of the winners are based in the UK, followed by six in China and Israel, and five in Canada. Other countries represented in this year's list include Japan, Denmark, Czech Republic, France, Poland, Germany, and South Korea.

### About CB Insights

CB Insights builds software that enables the world's best companies to discover, understand and make technology decisions with confidence. By marrying data, expert insights and work management tools, clients manage their end-to-end technology making process on CB Insights. To learn more, please visit www.cbinsights.com.

#### About InstaDeep

Founded in 2014, InstaDeep is an EMEA leader in decision-making AI products for the Enterprise, with headquarters in London, and offices in Paris, Tunis, Lagos, Dubai and Cape Town. With expertise in machine intelligence research and concrete business deployments, the Company provides a competitive advantage to its partners in an Al-first world. Leveraging its extensive know-how in GPU-accelerated computing, deep learning and reinforcement learning, InstaDeep has built products, such as its novel DeepChain<sup>™</sup> platform, that tackle the most complex challenges across a range of industries. InstaDeep has also developed collaborations with global leaders in the Artificial Intelligence ecosystem, such as Google DeepMind, NVIDIA and Intel. The Company is part of Intel's AI Builders program and was named a Preferred Deep Learning Partner by NVIDIA.
